Notes to the Unaudited Condensed Consolidated Interim Financial Statements

For the three and six months ended June 30, 2012

1. Corporate Information

Galane Gold Ltd., formerly Carlaw Capital III Corp., (the "Company" or "GGL"), operates through its wholly-owned subsidiary, Galane Gold Mines Ltd. ("GGM") which was incorporated under the *Business Corporations Act* (Ontario) on November 15, 2010 and whose principal business activities are the exploration for, development of, and operation of gold mining properties. The Company's registered and head office is located at Suite 1800, 181 Bay St., Toronto, Ontario, Canada.

Effective August 30, 2011, the Company, through its wholly-owned subsidiary, Mupane Gold Mines Limited, a Mauritius company, acquired all of the issued and outstanding shares of an Australian company, Gallery Gold Pty Ltd. from IAMGOLD Corporation ("IAMGOLD") (the "Gallery Acquisition"). The purchase price for such acquisition was paid by a combination of cash, shares and the issuance of interest bearing debt.

Effective August 30, 2011, the Company acquired all of the issued and outstanding shares of GGM by issuing an aggregate of 44,420,500 common shares from treasury in exchange for all of the issued and outstanding common shares of GGM. As a result of this share exchange, the former shareholders of GGM acquired control of the Company.

Effective April 10, 2012, the Company, through its wholly-owned subsidiary, Mupane Gold Mines Limited, a Mauritius company, acquired all of the issued and outstanding shares of The Northern Lights Exploration Company (Pty) Ltd. ("NLE"). The purchase price for such acquisition was paid by a combination of shares, cash, and the issuance of short term interest bearing debt.

These unaudited condensed consolidated interim financial statements include the results of operations of GGM from the date of incorporation, and Galane Gold Ltd. (formerly Carlaw Capital III Corp.) and Gallery Gold Pty Ltd. from August 30, 2011, the date of the Gallery Acquisition and the Carlaw Acquisition (collectively, the "Acquisitions") (Note 5).

2. Basis of preparation:

(a) Statement of compliance

The unaudited condensed consolidated interim financial statements (the "Financial Statements") of the Company and all of its subsidiaries as at and for the three and six months ended June 30, 2012 have been prepared in accordance with IAS 34, Interim Financial Reporting and do not include all of the information required for full annual consolidated financial statements. Accordingly certain information and disclosures normally included in annual financial statements prepared in accordance with International Financial Reporting Standards ('IFRS") have been omitted or condensed.

The Financial Statements have been approved by the Board of Directors on August 24, 2012.

(b) Significant accounting judgments, estimates and assumptions

The preparation of the Financial Statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the Financial Statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The particular areas of estimation uncertainty and critical judgments are outlined in detail in the annual audited consolidated financial statements for the year ended December 31, 2011 (the "Annual Financial Statements").

Notes to the Unaudited Condensed Consolidated Interim Financial Statements

For the three and six months ended June 30, 2012

2. Basis of preparation (continued):

(c) Basis of consolidation

The significant subsidiaries of the Company are accounted for as follows:

	Country of incorporation	% equity interest	Accounting Method
Galane Gold Mines Ltd.	Canada	100%	Consolidation
Mupane Gold Mines Limited	Mauritius	100%	Consolidation
Gallery Gold Pty Ltd.	Australia	100%	Consolidation
Mupane Gold Mining (Pty) Ltd. The Northern Lights Exploration	Botswana	100%	Consolidation
Company (Pty) Ltd.	Botswana	100%	Consolidation

A subsidiary is an entity controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The financial information of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

All balances, income and expenses and unrealized gains and losses resulting from transactions amongst subsidiaries of the Company are eliminated on consolidation.

The Company's other subsidiaries are Galane Gold Botswana (Pty) Ltd. (Botswana) (100% owned) and Shashe Mines (Pty) Ltd. (Botswana) (85% owned).

(d) Functional and presentation currency

The consolidated financial statements are presented in U.S. dollars, which is the functional currency of the Company and each of its subsidiaries. All amounts are in U.S. dollars, except where otherwise indicated.

3. Significant Accounting Policies:

These Financial Statements have been prepared following the same accounting policies and methods of computation as the Annual Financial Statements.

Notes to the Unaudited Condensed Consolidated Interim Financial Statements

For the three and six months ended June 30, 2012

4. Future Accounting Policies:

The following new standards, and amendments to standards and interpretations, were not yet effective for the second quarter ended June 30, 2012, and have not been applied in preparing these Financial Statements. They are summarized as follows:

IFRS 9- Financial Instruments

The IASB has issued IFRS 9, Financial Instruments, which is a four-part project proposing to replace IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 is planned to be effective on January 1, 2015. The Company is in the process of evaluating the impact of the changes to its consolidated financial statements as a result of the new standard.

IFRS 10- Consolidated financial statements

The IASB recently issued its new suite of consolidation and related standards, replacing the existing accounting for subsidiaries and joint ventures (now joint arrangements), and making limited amendments in relation to associates. IFRS 10 supersedes IAS 27, Consolidated and separate financial statements, and SIC 12, Consolidation- Special purpose entities. IFRS 10 will be effective January 1, 2013 and early adoption is permitted. The Company is in the process of evaluating the requirements of the new standards.

IFRS 13- Fair value measurement

IFRS 13 replaces the fair value measurement guidance contained in individual IFRS with a single source of fair value measurement guidance, and defines value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, i.e. an exit price. IFRS 13 is applicable prospectively starting January 1, 2013 and early adoption is permitted. The Company is in the process of evaluating the requirements of the new standards.

5. Acquisitions:

Gallery Acquisition:

On August 30, 2011, the Company acquired from IAMGOLD 100% of the outstanding shares of Gallery Gold Pty Ltd. ("Gallery"), an Australian company that, through its subsidiaries, holds the rights to conduct activities prescribed under mining and prospecting licenses at the Mupane gold mine, located in the Republic of Botswana (the "Mupane Property"). As consideration for the purchase of the shares of Gallery, IAMGOLD received 21,875,000 common shares, 1,265,253 warrants to purchase common shares in the capital of the Company and a promissory note in the amount of \$3,800,000 (note 12). Each warrant is exercisable into one common share of the Company on or before March 1, 2013 at a price of CDN\$1.10 per share.

On the closing of the NLE Acquisition referred to below, the number of warrants issued to IAMGOLD pursuant to the Gallery Acquisition was adjusted from 1,265,253 warrants to 4,377,778 warrants to purchase common shares in the capital of the Company exercisable on or before March 1, 2013 at a price of CDN\$1.10 per share. This issuance, combined with the common shares in the capital of the Company issued as a result of the NLE Acquisition would result in no change to IAMGOLD's percentage ownership interest in the Company.

The preliminary allocation of the purchase price to assets and liabilities acquired, based on preliminary estimates of fair value, is provided below. The Company's assessment of final valuation estimates is substantially complete in respect of inventories, restoration and rehabilitation provision, cash and other current assets. Final valuations of trade and other payables, plant and equipment, mining properties and ore stockpiles are not yet complete due to the inherent complexity associated with the valuations. This is a preliminary purchase price allocation and therefore subject to adjustment upon completion of the valuation process and analysis of resulting tax effects.

Notes to the Unaudited Condensed Consolidated Interim Financial Statements

For the three and six months ended June 30, 2012

5. Acquisitions (continued):

Gallery Acquisition (continued):

The preliminary purchase price allocation has been done taking into account the fair market value of each item acquired at the date of acquisition, August 30, 2011.

The Gallery Acquisition was accounted for using the acquisition method in accordance with IFRS 3 with the results of operations consolidated with those of the Company effective August 30, 2011.

Carlaw Acquisition:

On August 30, 2011, Carlaw acquired 100% of the outstanding shares of GGM by way of a "three-cornered amalgamation" pursuant to section 174 of the *Business Corporations Act* (Ontario). As the former shareholders of GGM acquired control of Carlaw, the Carlaw Acquisition is reported for accounting purposes as if GGM acquired Carlaw. As a result, the results of Carlaw are reflected only since the date of acquisition. Immediately after the Carlaw Acquisition, Carlaw filed articles of amendment to change its name to Galane Gold Ltd.

Carlaw is not considered a business for the purposes of IFRS 3, *Business Combinations*, and accordingly the transaction was accounted for as an acquisition of assets.

The fair values of identifiable assets and liabilities of Carlaw as at the date of acquisition were:

	Fair value
Other current assets Cash and cash equivalents Trade and other payables	\$ 9,180 179,678 (100,559)
Net assets	\$ 88,299

and comprehensive earnings)	(397,342) \$ 88,299

Notes to the Unaudited Condensed Consolidated Interim Financial Statements

For the three and six months ended June 30, 2012

5. Acquisitions (continued):

NLE Acquisition:

In addition to the Acquisitions, the Company entered into an agreement dated July 27, 2011 with the shareholders of NLE to acquire all of its issued and outstanding shares (the "NLE Acquisition"). NLE owns the rights to a number of exploration licenses near the Mupane Property.

The NLE Acquisition was completed on April 10, 2012. As consideration for all of the issued and outstanding shares of NLE, the Company issued 3,125,000 common shares to the shareholders of NLE and promissory notes in the aggregate principal amount of CDN\$400,000. The notes bear interest from the date of closing at 6% per annum with principal payments as follows:

• On closing CDN\$100,000

• On the 2nd, 4th, and 6th month anniversary after closing CDN\$100,000

If, in the reasonable opinion of the Board of Directors of the Company, any principal payment would cause undue stress to the Company, the principal payment can be extended to a mutually agreed upon schedule.

The agreement also provides for the issuance of up to an additional 8,750,000 common shares upon the achievement of the following exploration milestones on the NLE mineral properties within seven years from the date of the closing of the NLE Acquisition. The milestones set forth below are cumulative.

Milestone	Share Consideration	Cumulative Consideration
Exploration work on the mineral properties of NLE confirms by way of a NI 43-101 report a measured mineral resource containing at least 100,000 ounces of gold or the number of ounces of contained gold that is mined exceeds 100,000 ounces (or any combination thereof without duplication)	1,375,000 common shares	1,375,000 common shares

9. Financial instruments

The following table presents the carrying and estimated fair values of the Company's financial instruments.

		Carrying and Es	stima	ated Fair Value
Financial Assets		June 30,		December 31,
		2012		2011
	Φ.	15 600 011	Φ.	6.721.004

(level 2 of fair value hierarchy ⁽⁶⁾)		4,620,491		4,690,342
	\$	14,170,547		15,687,053

⁽¹⁾ The fair value of cash approximates the carrying amount given the short maturity period.

The appropriate level of fair value hierarchy is determined as follows:

- 1. Level 1- there are quoted prices in active markets for identical assets or liabilities.
- Level 2- there are inputs other than quoted prices that are either directly or indirectly observable for the asset or liability.
- 3. Level 3- these are inputs that are not based on observable market data.

(a) Financial risk management objectives and policies

The Company manages capital and its exposure to financial risks by ensuring it has sufficient financial capacity to support its operations, current mine development plans and long-term growth strategy. The Company is subject to various financial risks that could have a significant impact on profitability and financial conditions. These risks include liquidity risk, credit risk and financial market conditions relating to interest rates, gold price, and currency rates.

The following discussion includes a sensitivity analysis that is intended to illustrate the sensitivity to changes in market variables on the Company's financial instruments and show the impact on profit or loss and equity, where applicable. Financial instruments affected by market risk include cash, trade and other receivables, and accounts payable and accrued liabilities.

⁽²⁾ The fair value of trade and other receivables approximates the carrying amount given the short maturity period. Refer to the credit risk section below.

⁽³⁾ The fair value of accounts payable and accrued liabilities approximates the carrying amount given the short maturity period. Refer to the liquidity risk section below.

⁽⁴⁾ The fair value of loans and borrowings approximates the carrying amount given the short maturity period, and the fair market value rate of interest that it carries.

The fair value of warrants denominated in foreign currency approximates the carrying amount as the fair value was calculated at the date of issuance, August 30, 2011, plus the effect of changes in the assumptions to the Black Scholes Model that have occurred to June 30, 2012 (Note 14(d)).

For the three and six months ended June 30, 2012

9. Financial instruments (continued)

(b) Risks

Management reviews and approves policies for managing each of the risks which are summarised below:

i. Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

As at June 30, 2012, the Company's cash balance was \$15,688,011 (December 31, 2011 - \$6,531,004), and it had working capital of \$25,449,152 (December 31, 2011 - \$19,234,478).

The Company has a treasury policy to assist in managing the liquidity risk, which requires management to:

- monitor cash balances;
- perform short to medium-term cash flow forecasting, as well as medium and long-term forecasting incorporating relevant budget information; and
- consider the need for expanding treasury activity if and when appropriate (including but not limited to hedging and derivatives).

ii. Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk is associated with cash, trade and other receivables.

The Company holds cash in credit worthy financial institutions and does not hold any asset-backed commercial paper.

The credit risk related to gold trade receivable is considered minimal as gold is sold to creditworthy major banks and settled promptly, usually within the following month. The amount of \$5,281,342 included in trade and other receivables relating to gold production during the month of June, 2012 was received on July 3, 2012.

The credit risk related to receivables from government related to taxes, mineral rights and exploration tax credits, included in trade and other receivables, relates to not receiving amounts claimed from certain government audits. As a result, the full balance recorded may not be ultimately realized. Management currently does not expect the amount to be ultimately realized to be materially different from that currently recorded.

For the three and six months ended June 30, 2012

9. Financial instruments (continued)

(b) Risks (continued)

iii. Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. At this point in time, the Company carries warrants that are denominated in foreign currency, and their fair value fluctuates with market conditions such as interest rates and share price volatility. A 10% fluctuation in the value of these market prices would effect their value by \$500,000 in either direction.

iv. Foreign currency risk

The Company is exposed to currency risk through transactions denominated in currencies other than the U.S. dollar. The risk is mainly due to transactions incurred in South African Rand and Botswana Pula, along with the Canadian dollar. Net assets (liabilities) denominated in currencies other than US Dollar are summarised as follows:

Non US Dollar Currency	US Dollar Amount
Botswana Pula	\$ 669,475
Canadian Dollar	\$ (141,235)
	\$ 528,240

A 10% strengthening of the U.S. dollar against these foreign currencies as at June 30, 2012 would have resulted in an increase in the Company's annual earnings of \$50,000. This analysis assumes that all other variables, in particular interest rates, remain constant.

A 10% weakening of the U.S. dollar against these currencies as at June 30, 2012 would have had an equal but opposite effect on the Company's annual earnings as summarised in this analysis.

(c) Capital management

The Company's objectives when managing capital are:

- to ensure the Company has sufficient financial capacity to support its operations, current mine development plans and the long-term growth strategy;
- to provide a superior return to its shareholders; and
- to protect the Company's value with respect to markets and risk fluctuations.

The Company manages capital by looking at the following items: debt and shareholders' equity.

The Company's capital structure reflects the requirements of a company focused on growth in a capital intensive industry that experiences lengthy development lead times as well as risks associated with capital costs and timing of project completion due to factors that are beyond the Company's control, including the availability of resources, the issuance of necessary permits, costs of various inputs and the volatility of the gold price.

Notes to the Unaudited Condensed Consolidated Interim Financial Statements

For the three and six months ended June 30, 2012

9. Financial instruments (continued)

(c) Capital management (continued)

The adequacy of the Company's capital structure is assessed on an ongoing basis and adjusted as necessary after taking into consideration the Company's strategy, the forward gold prices, the mining industry, economic conditions and the associated risks. In order to maintain or adjust its capital structure, the Company may adjust its capital spending, issue new shares, or arrange for a debt facility.

10. Restoration and rehabilitation provision

At June 30, 2012	\$	5,227,510

The Company makes full provision for the future cost of rehabilitating mine sites and related production facilities on a discounted basis on the development of mines or installation of those facilities.

The restoration and rehabilitation provision represents the present value of restoration and rehabilitation costs relating to mine sites, which are expected to be incurred up to 2014. These provisions have been created based on the Company's internal estimates. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. Management used a pre-tax discount rate and inflation factor of 10.0% in preparing the Company's provision. These estimates are reviewed regularly to take into account any material changes to the assumptions. However, actual rehabilitation costs will ultimately depend upon future market prices for the necessary decommissioning works required, which will reflect market conditions at the relevant time. It will also depend on the methods employed and related laws in force at the time of rehabilitation. Furthermore, the timing of rehabilitation is likely to depend on when the mine ceases to produce at economically viable rates. This, in turn, will depend upon future gold prices, which are inherently uncertain, and identification of future mineral reserves and resources. The undiscounted inflation adjusted liability for the restoration and rehabilitation provision is \$6,943,747.

11. Trade accounts payable and accrued liabilities:

	June 30, 2012	December 31, 2011
Trade accounts payable	\$ 3,789,245	\$ 5,822,564
Accrued liabilities	1,687,877	1,374,147
Amounts payable re: NLE Acquisition (Note 5)	198,250	-
-	\$ 5,675,372	\$ 7,196,711

Trade accounts payable and accrued liabilities are non-interest bearing and are normally settled on 60 day terms after date of receipt of invoice. The amounts payable re: NLE Acquisition bear interest of 6% per annum and are payable in three equal instalments of principal plus interest, with the two remaining instalments due on August 12, 2012 and October 12, 2012.

12. Interest-bearing loans and borrowings:

The Company issued an unsecured note to IAMGOLD as part of the consideration paid for the purchase of the shares in the Gallery Acquisition (see Note 5). Details are as follows:

• Initial principal amount \$3,800,000

• Interest rate fixed rate of 6% per annum, payable quarterly commencing

November 30, 2011

• Principal repayment \$1,266,667 on February 28, 2013, August 30, 2013, and

February 28, 2014

The Company acquired two vehicles for use at the mine for total cost of \$96,439 and financed the purchase under two capital lease obligations. The capital leases are for a term of 26 months, with monthly payments of \$2,452.52 per month principal and interest. At June 30, 2012, the liability is reflected as:

Amounts due within one year Amounts due beyond one year	\$ 20,071 74,684
Total amount due	\$ 94,755

13. Income and Mining Taxes:

The Company estimates the effective tax rate expected to be applicable for the full fiscal year and uses that rate to provide for income taxes in interim reporting periods. The Company also recognizes the tax impact on certain discrete (unusual or infrequently occurring) items, including changes in judgment concerning the probable realization of losses and effects of changes in tax laws or rates, in the interim period in which they occur.

As a result of the effect of utilization of loss carry forwards available to the Company, the Company reported no income tax expense for the three and six months ended June 30, 2012 (three and six months ended June 30, 2011 - \$nil). The effective income tax rates vary from the combined Canadian federal and provincial statutory income tax rate of 27% for the three and six months ended June 30, 2012 (three and six months ended June 30, 2011 - 28%) due to the geographical distribution of earnings, which are subject to different tax rates, fluctuations in exchange rates and other non deductible expenses.

The Company has generally not recognized tax benefits on losses generated in several countries where the recent history of operating losses does not satisfy the probable criteria for the recognition of deferred tax assets. Consequently, there are no income tax benefits recognized on the pre-tax losses in these jurisdictions.

14. Share Capital

(a) Authorized share capital:

As at June 30, 2012, the authorized share capital of the Company consisted of an unlimited number of common shares. All issued shares are fully paid.

(b) Issued share capital:

During the year ended December 31, 2011, the Company had the following share transactions:

On August 5, 2011, GGM completed a brokered private placement (the "GGM Private Placement") of an aggregate of 20,545,500 subscription receipts (the "GGM Subscription Receipts") at a subscription price of CDN\$0.80 per receipt for aggregate gross proceeds of \$16,806,220 (CDN\$16,436,400). Each GGM Subscription Receipt entitled the holder to receive one common share of GGM (a "GGM Share") and one-half of one common share purchase warrant of GGM (a "GGM Warrant"). Each whole GGM Warrant is exercisable for one GGM Share for a period of 18 months from the date of closing of the Carlaw Acquisition at a price of CDN\$1.10 per share. The gross proceeds from the GGM Private Placement were held in escrow until immediately prior to the closing of the Gallery Acquisition on August 30, 2011.

The agent (the "Agent") retained by GGM pursuant to the GGM Private Placement received a cash commission of \$1,008,373 and was issued warrants ("GGM Agent Warrants") to purchase up to an aggregate of 1,888,980 GGM Shares with each GGM Agent Warrant being exercisable for one GGM Share for a period of 18 months from closing of the Acquisitions at a price of CDN\$0.80 per share. These warrants were valued at \$587,938 (see note 14(d)). Additional costs of \$352,002 were incurred in connection with the financing.

Immediately prior to the closing of the Gallery Acquisition, the GGM Subscription Receipts converted into an aggregate of 20,545,500 GGM Common Shares and 10,272,750 GGM Warrants. At the effective time of the closing of the Carlaw Acquisition, the GGM Common Shares, GGM Warrants and GGM Agent Warrants were then exchanged for an equivalent number of common shares, warrants and agent warrants of the Company without payment of any additional consideration. Accordingly, at the closing of the Acquisitions, the Company issued an aggregate of 20,545,500 common shares, 10,272,750 warrants valued at \$2,351,750 (Note 14(d)) and 1,888,980 agent warrants valued at \$587,938 (Note 14(d)) in connection with the GGM Private Placement.

Consideration for the Gallery Acquisition included 21,875,000 common shares, a note payable of \$3.8 million, and warrants to purchase up to 1,265,253 common shares, exercisable until March 1, 2013 at CDN\$1.10 per share ("IAMGOLD Warrants"). These warrants were valued at \$306,750 as described in Note 14(d). The Agent was paid \$536,812 for the issuance of the common shares.

At June 30, 2012, a total of 12,938,124 common shares and warrants to purchase up to 1,123,564 common shares held by certain directors and officers and IAMGOLD are held in escrow, releasable in equal tranches of 25% every six months after September 2, 2011. Over and above the escrow conditions, as at June 30, 2012, a total of 16,608,333 common shares are subject to a "lock-up" agreement with the Agent whereby the holders agree not to sell their shares for a period of 18 months from August 30, 2011, subject to early release in certain circumstances.

During the three and six month period ended June 30, 2012, the Company had the following share transactions:

On June 15, 2012, in accordance with the Company's employee stock purchase plan ("ESPP"), certain directors and officers subscribed for 63,130 common shares of the Company, at a price of CDN\$0.99 per share, for gross proceeds of CDN\$62,500 (\$62,238).

(c) Stock options:

The Company has a stock option plan whereby options may be granted to directors, officers, employees and consultants. As at June 30, 2012, a maximum of 4,829,613 options to purchase common shares were issuable under the Company's stock option plan, of which 2,690,863 remained available for issuance. Under the Company's stock option plan, the Company may grant options for up to 10% of the issued and outstanding common shares to directors, officers, employees and consultants. Under the plan, the exercise price and vesting is at the discretion of the Board, can be granted for a maximum term of ten years, with certain restrictions as to limits on amounts granted to insiders, consultants or person engaged in investor relations activities.

(c) Stock Options (continued):

The Company recognizes share-based compensation expense for all stock options granted using the fair value based method of accounting as calculated by using the Black Scholes Model. Currently it uses the following weighted average assumptions for the Model:

- Share price	\$1.06
- Risk free discount rate	1.02%
- Expected volatility (using historic volatility of comparable	
companies as a basis)	80%
- Expected life	2.5 years
- Dividend rate	nil

As no options were issued and/or vested in the period, no amount for share-based compensation has been recognized in the period.

(d) Warrants (continued):

¹ Using the Black Scholes Model for estimating fair market value, the warrants issued to investors were valued at \$2,351,750 on issuance, and on the Gallery Acquisition were valued at \$846,335 on issuance and then re-valued on a quarterly basis since issuance. As a result of changes in the share price of the Company since issuance, a decrease in the expected life as time passes, and fluctuations in exchange rates between the Canadian and US dollar, the warrants have decreased in value by \$490,614 for the six month period ended June 30, 2012, and increased in value by \$540,896 for the three month period then ended for a total balance at June 30, 2012 of \$3,883,841. The assumptions used in the Black Scholes Model are:

Risk free discount rate
 Expected volatility (using historic volatility of comparable companies as a basis)
 Expected life from issuance
 1.02%
 80%
 0.75 years

² Using the Black Scholes Model for estimating fair market value, the warrants issued to the Agent were valued at \$587,938 on issuance and then re-valued on a quarterly basis since issuance. As a result of changes in the share price of the Company since issuance, a decrease in the expected life as time passes, and fluctuations in exchange rates between the Canadian and US Dollar, the warrants have decreased in value by \$118,822 for the six month period ended June 30, 2012, and increased in value by \$85,870 for the three month period then ended for a total balance at June 30, 2012 of \$736,650. The assumptions used in the Black Scholes Model are:

Risk free discount rate
 Expected volatility (using historic volatility of comparable companies as a basis)
 Expected life from issuance
 1.02%
 80%
 0.75 years

A recovery of \$609,436 (reflected as financing income) has been recorded in the statement of earnings and comprehensive earnings to reflect the movement in fair value of the warrant for the six months ended June 30, 2012, and an expense (reflected as financing costs) of \$626,765 has been reflected for the three month period ended June 30, 2012.

At June 30, 2012, a total of 1,123,564 warrants were held in escrow, releasable in equal tranches of 561,782 warrants every six months after September 2, 2011.

(e) Performance shares:

On August 30, 2011 the Company authorized for allotment, to the Chairman and the CEO of the Company, a maximum of 2,500,000 common shares (the "Performance Shares"), which will become issuable on the achievement by the Company and its subsidiaries of the following performance milestones prior to September 2, 2014:

- 1. 130,000 ounces of gold production from the Company's mining properties at an average cash cost per ounce of \$900 or less over any eight consecutive fiscal quarters; or
- 2. \$25,000,000 of cash flow from operations from its mining properties in any four consecutive fiscal quarters.

To date, neither milestone has been reached, therefore no shares have been issued. The progress of the Company's mining operations to date plus budgeted amounts has been insufficient to indicate that these milestones will be achieved. The Company has not recorded any related expense or obligation as of June 30, 2012.

(f) Earnings per share:

The calculations of earnings per share is based on the following data:

		ree months ded June 30, 2012		Six months ded June 30, 2012		ree months nded June 30, 2011		ix months ided June 30, 2011
Earnings (loss)	\$	359,780	\$	11,807,128	\$	(151,345)	\$	(357,688)
Weighted average number of common shares outstanding for purposes of basic earnings per share Dilutive warrants Dilutive options		47,896,299 - -		46,502,150		2,000,000		2,000,000
Weighted average number of common shares outstanding for the purpose of diluted earnings per share		47,896,299		46,502,150		2,000,000		2,000,000
Earnings (loss) per share	¢.	0.0075	\$	0.2520	Φ.	(0.0657)	¢	(0.1700)
Basic Diluted	\$ \$	0.0075	\$ \$	0.2539 0.2539	\$ \$	(0.0657) (0.0657)		(0.1788) (0.1788)

Basic earnings per share is computed by dividing the earnings by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the potential dilution of outstanding warrants, stock options and performance shares in the weighted average number of common shares outstanding during the period, if dilutive. In the three and six month periods ended June 30, 2012, all of the stock options and warrants were dilutive. The performance shares were not included in the calculation of diluted earnings per share because the conditions for their issuance had not been met assuming that the end of the contingency period was the reporting date. In 2011, there were no warrants, stock options or performance shares.

(g) Employee stock purchase plan:

The Company has adopted an ESPP, which was approved by shareholders at the annual and special meeting of the Company on June 12, 2012. Under the terms of the ESPP, each participating officer, director, or employee that has been employed with the Company or its subsidiaries for at least six months is entitled to receive the matching number of common shares acquired pursuant to the ESPP at no cost to such officer, director or employee. Subject to certain conditions, such deferred matching shares will be issued to the participating officers, directors or employees over a three-year period following the date of the purchase of the qualifying shares.

As at June 30, 2012, 63,130 common shares have been subscribed for under the ESPP. As a result, the participating officers, directors and employees of the Company may be issued an aggregate of 63,130 deferred matching shares in three equal tranches over a three-year period.
